

TOP  
TUNES

Now a tradition within these pages, we list out all the tunes mentioned within the various articles in this issue. We do this to demonstrate the spread of diverse musical tastes that exists amongst those who choose to upgrade the sound in their cars. After all, without music, the whole thing is pointless. These days, music can be found everywhere and listened to everywhere. Our concern is that if it is not reproduced in the right

way, many genres and artists can be dismissed when further listening may reveal works of art that you may have previously discarded.

For me, all music is valid and has its place provided it is properly recorded and contains some measure of competence. If you cannot hear every element in a recording without placing your brain into overdrive then it may be time for you to upgrade your own car.
